

Welcome to the CSR Accreditation Application form

The application process should be approached as a blank canvas exercise in which you include any information you feel relevant. There are questions under each pillar to inspire and support your application but these are not designed to be limiting in any way. The main body of the application should be succinct and summarise key points for each of the sub categories. You may bullet point where appropriate and refer to more detail in the supporting evidence.

Some information will be suitable under more than one pillar - cross reference wherever applicable. Reference existing internal and external reports, audit findings, newsletters and web material wherever possible. Collate evidence for each pillar under a corresponding appendix so that your final submission has four appendices (Appendix 1 Environment, Appendix 2 Workplace etc). Consultation and review of a draft application can be arranged on request and for a fee - see https://csr-accreditation-applications-fees/ fees/ for latest products and fees.

Please make sure that you have familiarised yourself with the Independent Assessment Guidance Notes & Criteria on the following page. The Independent Assessment Panel refer to these guidance notes when assessing your application.
